

## F Connector Splitters

- Amplified
- Wideband (40-2150 MHz) or Satellite Band
- 75 Ohm Units

## Product Description

The Global range of splitters allow one polarized or IF signal to be split to a number of receivers.

The Split4AF and the Split8AF incorporate an amplifier, such that the level leaving each port is the same as the input level.

Diodes connected to each output allow any receiver to supply the LNB without interaction.

**SPLIT4AF** -4way wideband active splitter, 0dB.

**SPLIT8AF** - 8way active wideband splitter.

## Specification

	<i>Split4AF</i>	<i>Split8AF</i>
<b>Freq. Range MHz</b> .....	700-2150.....	700-2150
<b>Return Loss</b> .....	10dB.....	10dB
<b>Loss</b> .....	0dB.....	0dB
<b>Amplified</b> .....	NO.....	NO
